https://www.linkedin.com/in/angga-vb/ | https://github.com/anggavb | https://anggavb.my.id

Fullstack Developer with 5 years of experience building and maintaining enterprise web applications using Golang, React.js, Laravel, Vue.js, PostgreSQL, MySQL, Redis, Docker, and REST APIs. Experienced in developing modular backend systems, optimizing legacy applications, improving database performance, and delivering multi-module workflows for corporate and government environments. Hands-on experience in building internal business platforms, government web systems, media monitoring tools, learning management systems, and self-hosted infrastructure projects. Strong focus on maintainable architecture, production stability, clean code, and translating business requirements into scalable technical solutions.

Professional Experience

Koda Tech Academy - Onsite (Bogor, Jawa Barat)
Fullstack Developer Trainee **Feb 2026 - Jun 2026**

ShortLink – URL Shortener Platform | *Jun 2026*

- Developed a fullstack URL shortening platform using **React.js, Golang, Gin, PostgreSQL, Redis, Docker, and REST APIs**.
- Built secure authentication, user registration, login/logout, profile management, and protected dashboard with JWT-based authorization.
- Implemented URL shortening with custom slug support, search, pagination, clipboard copy, soft delete, and click analytics to improve link management.
- Integrated Redis caching to accelerate short URL resolution and reduce database access while implementing Swagger documentation, database migrations, and seeders for maintainability.

Tech Stack: React.js, Vite, Redux, Tailwind CSS, Golang, Gin, PostgreSQL, Redis, Docker, REST API

Tickitz – Online Movie Ticket Booking Platform | *Jun 2026*

- Led a 4-person team as Team Lead to deliver the project in under one month, coordinating scope, task allocation, and frontend/backend integration.
- Built the frontend with React.js, Vite, Redux Toolkit, React Router, Axios, Tailwind CSS, and React Hook Form for movie browsing, search, movie detail pages, seat booking, payment flow, booking history, profile management, and admin workflows.
- Developed backend services using Golang, Gin, PostgreSQL, Redis, JWT, and Docker to support authentication, movie and schedule management, seat map lookup, pending order flow, payment processing, QR ticket generation, and dashboard APIs.
- Designed backend API structure using Go Gin with PostgreSQL database integration and migration/seeder workflow.
- Implemented database migrations, seeders, and Swagger API documentation to improve maintainability, API clarity, and testing readiness.

Tech Stack: React.js, Vite, Redux, Tailwind CSS, Golang, Gin, PostgreSQL, Redis, Docker, REST API

Kasvior – E-Wallet Web Application | *Mar 2026 - May 2026*

- Built a fullstack e-wallet web application using React.js, Golang, Gin, PostgreSQL, Redis, Docker, and REST APIs.
- Developed core wallet features including authentication, login/logout flow, balance management, transaction history, and send/receive money workflow.
- Implemented responsive frontend architecture using React.js, Vite, Redux/Zustand, and Tailwind CSS.
- Designed backend API structure using Go Gin with PostgreSQL database integration and migration/seeder workflow.
- Integrated Redis caching for selected backend processes to improve API response efficiency.

Tech Stack: React.js, Vite, Redux, Zustand, Tailwind CSS, Go, Gin, PostgreSQL, Redis, Docker, REST API

PT Centrinova Solusi Edukasi - **Hybrid**

Fullstack Developer **Feb 2022 - Feb 2026**

- Developed and maintained enterprise web applications using Laravel, Vue.js, PostgreSQL, MySQL, and REST APIs for financial services, HR platforms, learning management systems, and internal business workflows.
- Delivered key modules for **FIF Learning Management System**, including budget management, approval workflows, reporting, and employee training evaluation features.
- Developed multiple modules for **HRULTRA / UOB HR Platform**, including NPS, room booking, and employee engagement tools, while improving usability and legacy module performance.
- Built and maintained **Danamon KUIZU** admin panel features for user management, role management, and game integration workflows in collaboration with the game development team.
- Designed backend APIs, database structures, and modular application features to improve maintainability and development scalability and optimized legacy application bottlenecks and database queries to improve production stability and system responsiveness.

Kementerian PPN/Bappenas - **Onsite (Kuningan, Jakarta)**

Web Developer & Application Administrator **Feb 2021 - Dec 2025**

- Collaborated with **Pusdatinrenbang Division** to develop, maintain, and improve public-facing government web platforms and internal application systems.
- Contributed to official Bappenas website development by building and enhancing CMS modules for article management, category management, tagging, and role-based news administration.
- Supported UAT for **Indonesia 2045** website by validating content publishing workflows, homepage content behavior, article management, and administrator-side functionality.
- Participated in SSO gateway architecture discussions, covering integration strategy, authentication flow, and application access management across Bappenas systems.
- Managed stakeholder requests, troubleshooting, content administration workflows, and operational support for public-facing government platforms.

MediaWatch Bappenas

Solo Full-Stack Developer | Aug - Dec 2025

- Designed and developed a fullstack media monitoring and analytics platform using Laravel, Vue.js, PostgreSQL, Vuetify, and REST APIs.
- Implemented PostgreSQL Full-Text Search with multi-keyword search, relevance ranking, highlighted snippets, and GIN indexing for improved search performance.

- Built article management, Excel import/export, sentiment tracking, and speaker tracking modules for media analytics workflows.
- Implemented authentication and role-based access control using Laravel Sanctum.
- Designed modular backend API structure and responsive SPA frontend to support maintainability and future feature expansion.

Tech Stack: Laravel, Vue.js, PostgreSQL, Full-Text Search, GIN Indexing, Sanctum, Pinia, Vuetify, REST API

PT Medika Solusi Pratamajaya - Onsite (Bogor, Jawa Barat)
Web Developer **Jan 2020 - Feb 2021**

- Built healthcare web applications end-to-end using Laravel, MySQL, jQuery, and REST API integrations to support daily operational workflows.
- Developed and maintained core modules for healthcare business processes, including data management, validation, and operational reporting features.
- Designed database structures and implemented backend logic to support application features and operational data processing.
- Optimized MySQL queries and backend logic to improve application responsiveness and reduce recurring system issues.
- Collaborated with internal users to gather requirements, troubleshoot production issues, and deliver practical application improvements.

PT Exa Mitra Solusi - Onsite (Kedoya, Jakarta)
IT Support **Nov 2018 - Dec 2019**

- Developed an internal credit card submission workflow application using CodeIgniter, JavaScript, and MySQL.
- Implemented form validation, approval workflows, and submission tracking to improve process accuracy and reduce manual handling.
- Built database-driven features to manage submission data, user input, and internal workflow status.
- Supported IT operations, user troubleshooting, and system usability for internal business users.
- Collaborated with internal business users to identify workflow issues and improve the usability of internal tools.

EDUCATION

Koda Tech Academy - Bogor, Jawa Barat **Feb 2026 - Jun 2026**
Fullstack Web Developer

- Frontend Development: React.js, Redux Toolkit, Zustand, React Router, Tailwind CSS
- Backend Development: Golang, Gin-Gonic, PostgreSQL, Redis
- DevOps: Git, Docker, SSH, CI/CD, Database Migration & Seeder

Esa Unggul University - Kebon Jeruk, Jakarta **2023 - Expected 2026**
Bachelor's degree in Information Systems

Politeknik LP3I Jakarta - Bogor, Jawa Barat **2015 - 2018**
Diploma Degree of Computer Informatics

SKILLS

Backend Development: Laravel, Golang, Gin-Gonic, Express.js, REST API, gRPC, Clean Architecture
Frontend Development: React.js, Redux, Zustand, Vue.js, Astro, Vite, Tailwind CSS, Responsive Design
Databases: PostgreSQL, MySQL, Redis, SQL Optimization, Eloquent, Sequelize
DevOps & Deployment: Docker, Dockerfile, Docker Compose, Github Action, CI/CD, NGINX, Linux CLI
Testing: Postman, Go Test, Swagger
Tools: Git, GitHub, GitLab, Bitbucket, Trello, Vercel, Railway, Supabase
Engineering Practices: Performance Optimization, Debugging, Input Validation, HTTPS, OAuth, CORS, RBAC, JWT, PASETO
